LIST OF CONTENTS

NUMBER 1

Special Issue in honour of Gino Moretti on the occasion of his 70th birthday

Gianky DaForno	v	Preface
Saul Abarbanel, Pravir Duth and **David Gottlieb**	1	Splitting methods for low Mach number Euler and Navier–Stokes equations
G. Chiocchia and **B. Gabutti**	13	A new transformation for computing hypergeometric series and the exact evaluation of the transonic adiabatic flow over a smooth bump
A. Dadone, B. Fortunato and **A. Lippolis**	25	A fast Euler solver for two- and three-dimensional internal flows
A. Dervieux, B. Larrouturou and **R. Peyret**	39	On some adaptive numerical approaches of thin flame propagation problems
Maurizio Di Giacinto and **Mauro Valorani**	61	Shock detection and discontinuity tracking for unsteady flows
R. E. Gordnier and **S. G. Rubin**	85	Transonic flow solutions using a composite velocity procedure for potential, Euler and RNS equations
B. Grossman and **R. W. Walters**	99	Flux-split algorithms for the multi-dimensional Euler equations with real gases
Darryl W. Hall	113	Application of λ-differencing schemes to hypersonic inviscid flows
Czeslaw P. Kentzer	127	Physics and computations of gas dynamic waves
Robert W. MacCormack and **Graham V. Candler**	135	The solution of the Navier–Stokes equations using Gauss–Seidel line relaxation
F. Marconi	151	Complex shock patterns and vortices in inviscid supersonic flows
Robert E. Melnik	165	An asymptotic theory of turbulent separation
M. Napolitano and **P. Cinnella**	185	A numerical study of planar and axially-symmetric sudden expansion flows
Marcello Onofri and **Diego Lentini**	195	Fast numerical solver for transonic flows
M. Pandolfi and **F. Larocca**	205	Transonic flow about a circular cylinder

P. L. Roe 221 Remote boundary conditions for unsteady multi-dimensional aerodynamic computations

S. Rudman 233 One-dimensional Euler equation algorithm with a very high asymptotic convergence rate

M. D. Salas and **G. Kuruvila** 247 Vortex breakdown simulation: a circumspect study of the steady, laminar, axisymmetric model

M. J. Siclari, P. DelGuidice and **F. Koch** 263 Euler flows about arbitrary cross sections using a node centered finite volume scheme

Luca Zannetti and **Bernardo Favini** 289 About the numerical modelling of multidimensional unsteady compressible flow

I Announcements

III Software Survey Section

VII Softstrip® computer-readable data strip containing the table of contents of this issue of *Computers & Fluids*

NUMBER 2

i Softstrip® computer-readable data strip containing the table of contents of this issue of *Computers & Fluids*

R. W. Claus 301 Direct numerical simulations of a temporally evolving mixing layer subject to forcing

Ünver Kaynak and **Jolen Flores** 313 Advances in the computation of transonic separated flows over finite wings

D. F. Fletcher and **A. Thyagaraja** 333 Some calculations of shocks and detonations for gas mixtures

Ronald W. Yeung and **Chun-Fa Wu** 351 Nonlinear wave-body motion in a closed domain

M. A. Leschziner and **K. P. Dimitriadis** 371 Computation of three-dimensional turbulent flow in non-orthogonal junctions by a branch-coupling method

J. P. Choquin and **S. Huberson** 397 Particles simulation of viscous flow

Technical Note

Andrzej Służalec 411 An analysis of thermal phenomena in electromagnetic field during electroslag welding

I Announcement

III Software Survey Section

NUMBER 3

i Softstrip® computer-readable data strip containing the table of contents of this issue of *Computers & Fluids*

Issei Fujishiro, Yasuhiko Ikebe, Akira Harashima and **Masataka Watanabe** 419 A note on cyclic reduction Poisson solvers with application to bioconvective phenomena problems

Lawrence D. Cloutman 437 Numerical simulation of the decay of turbulent swirling flow in a constant volume combustion bomb

M. R. Malin 453 Modelling the effects of lateral divergence on radially spreading turbulent jets

A. I. van de Vooren and **H. A. Dijkstra** 467 A finite element stability analysis for the Marangoni problem in a rectangular container with rigid sidewalls

Fu-Chu Chou 487 Effect of nonuniform heating on laminar mixed convection in the entrance region of horizontal ducts

Roland Hunt and **Graham Wilks** 497 A computer extended series examination of mixed convection in a buoyant plume

I Announcements

III Software Survey Section

NUMBER 4

i Softstrip® computer-readable data strip containing the table of contents of this issue of *Computers & Fluids*

A. Dagan 509 Pseudo-spectral and asymptotic sensitivity investigation of counter-rotating vortices

Douglas D. Cline and **Graham F. Carey** 527 Symbolic eigenvalue analysis for adaptive stepsize control in PNS shock stabilization

R. E. Hayes, K. Nandakumar and **H. Nasr-El-Din** 537 Steady laminar flow in a 90 degree planar branch

Adam Wanik and **Uwe Schnell** 555 Some remarks on the PISO and SIMPLE algorithms for steady turbulent flow problems

Hong-Ming Jang, Tuncer Cebeci and **Herbert B. Keller** 571 A preferred approach to the linearization of turbulent boundary-layer equations

H. M. Badr, S. C. R. Dennis and **P. J. S. Young** 579 Steady and unsteady flow past a rotating circular cylinder at low Reynolds numbers

Technical Note
C. C. Horstman 611 Prediction of secondary separation in shock wave boundary-layer interactions

I Announcement

III Software Survey Section
